EDUCATION

DePaul University

Masters of Science, Human Computer Interaction

Chicago, IL

June 2025

Symbiosis Institute Of Design

Bachelor of Design, Industrial Design

Pune, India

June 2022

EXPERIENCE

UX/UI Designer

Rebecca Everlene Trust Company

October 2025 – Present

Chicago, IL

- Led 0→1 user-centered design for a B2C web platform - from discovery through wireframing, prototyping, and high-fidelity execution - structuring complex content into gamified learning modules, increasing task completion rates by 25% and reducing early-stage drop-off by 40%.
- Partnered cross-functionally with Product and Engineering, shaping design strategy and AI-driven solutions, flagging technical constraints during early wireframing, avoiding 2 late-stage redesigns before ship.
- Compressed time-to-prototype by 50% by integrating AI-automated design workflows, across 10+ features, maintaining design fidelity and system coherence.

Product Designer

OptraHealth

Dec 2024 – Mar 2025

San Jose, CA

- Researched, prototyped, and shipped mobile on-boarding flows, a patient management dashboard, and web-based provider monitoring features for a health-tech SaaS platform - lifting weekly engagement by 30%.
- Primary product designer for Zoe, an AI companion, designing the interaction layer from the ground up – mapping interaction models to user inputs and care touch-points, increasing exercise tutorial completion by 28%.
- Built a 100+ component Figma library adopted by Product Managers and Engineers for independent prototyping – freeing design bandwidth for high-complexity system work.
- Conducted 20+ usability testing and heuristic evaluation sessions across patients, parents, and providers; synthesized findings into prioritized UX recommendations that cut onboarding drop-off among parents by 20%.

UX Designer

Onward Technologies

Jul 2024 – Aug 2024

Chicago, IL

- Designed diagnostic workflows and automated reporting features for a B2B health-tech platform MVP – from journey mapping through wireframing, iterative prototyping, and high-fidelity delivery – enabling clinicians to complete diagnostic tasks 20% faster while maintaining compliance in a regulated environment.
- Compressed MVP delivery timeline from 10 to 7 weeks through user-centered prototyping and early usability validation, eliminating 5 high-severity interaction issues before engineering commitment.
- Applied heuristic evaluation and competitive analysis across 15+ stakeholder workshops to set design direction across 3 product pivots – directly reshaping sprint priorities and roadmap sequencing.

Visual Designer

DAB of India

Jan 2023 – Aug 2023

Pune, India

- Built an AI-assisted design workflow spanning copy, mockups, and social/print assets for 25+ clients – maintaining brand standards across 1,000+ assets.
- Designed brand pitch decks used in client acquisition, contributing to 5+ new client wins.

SKILLS & TOOLS

Design: User Research, Design for Artificial Intelligence, Usability Testing, Design Systems, Information Architecture, Product Strategy, Competitive Analysis, A/B Testing, Accessibility (WCAG 2.2)

AI Prototyping and Development: Lovable, Figma & Figma Make, Cursor AI, Adobe Illustrator, Adobe Photoshop, Framer, HTML5/CSS, JavaScript, Miro

Research: Perplexity, Claude, UserTesting, Usability Testing, Heuristic Evaluation, Journey Mapping, A/B Testing, Competitive Analysis
